VISION

My ambition is to become a professional graphic designer. That's the reason I started studying this subject in high school and continued it in New Bulgarian University. I saw that in the Netherlands I have greater opportunities to fulfil my dreams.

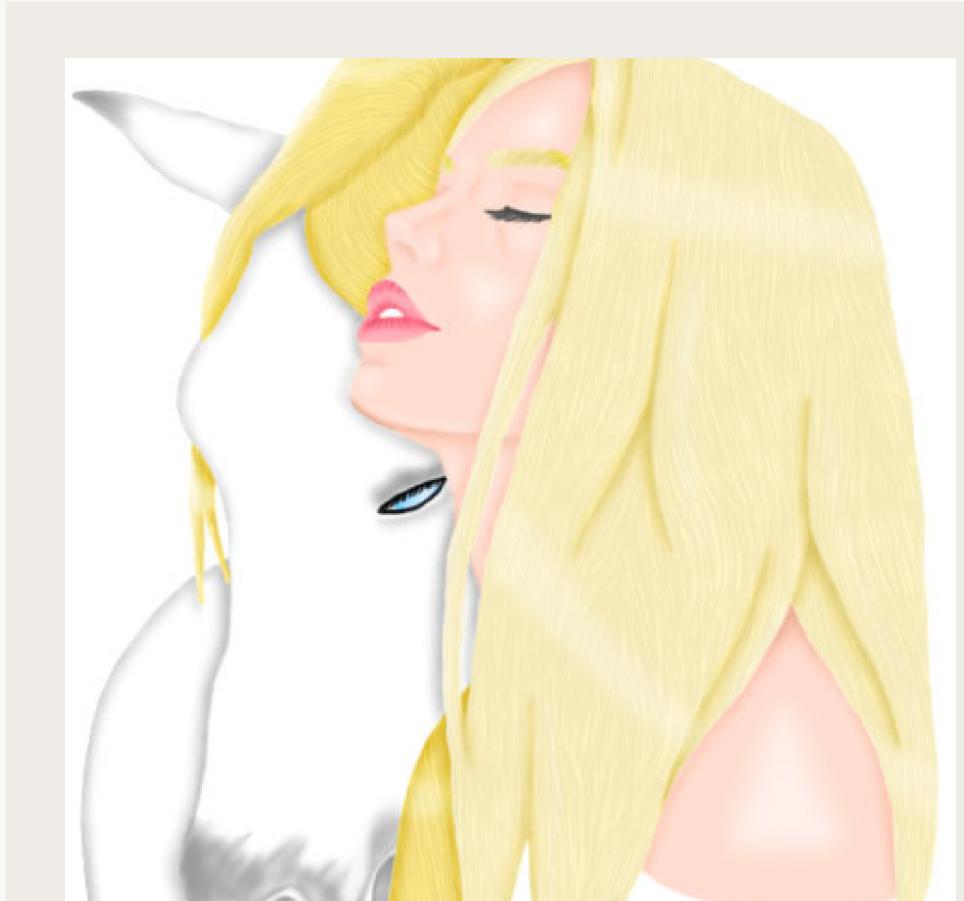

PERSONAL SKILLS

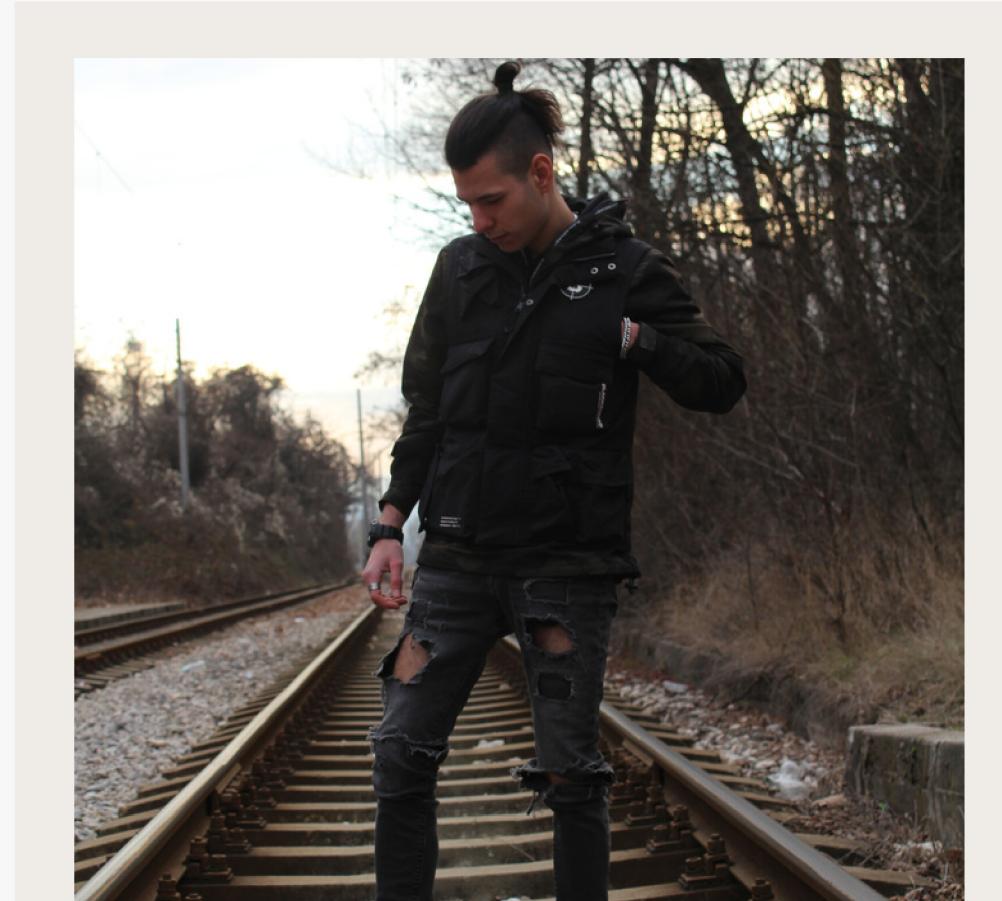

Here are my top three personal skills and beloved hobbies:

Graphics Designing

Drawing

Photography

EDUCATION

I graduated from Polygraphy and Photography highschool - from 8th grade to 12th grade. I was studying graphic design and also photography. We were learning about Adobe Photoshop, Illustrator and InDesign, also we were learning a little HTML. I was very good at photoshop because before highschool I was learning a lot about it. I graduated with great score in highschool and after that I got accepted in New Bulgarian University. There we were still learning about Photoshop, Illustrator and InDesign but then I decided to go to the Netherlands so I can develop more and to learn more.
